**Roles:****Project Manager / Designer:**

I took full ownership of design, management and production of projects from business development through final occupancy.

**Project Director / Planner:**

I worked closely with clients to research and evaluate possible school sites, worked with community groups on conceptual site planning, and developed early project concepts. I directed project teams in the production of construction documents, and acted as the prime client point-of-contact.

**Project Architect / Designer:**

Working closely with a project manager, I was responsible for the design and creation of construction documents and all design related questions during construction.
